## 1 System Description

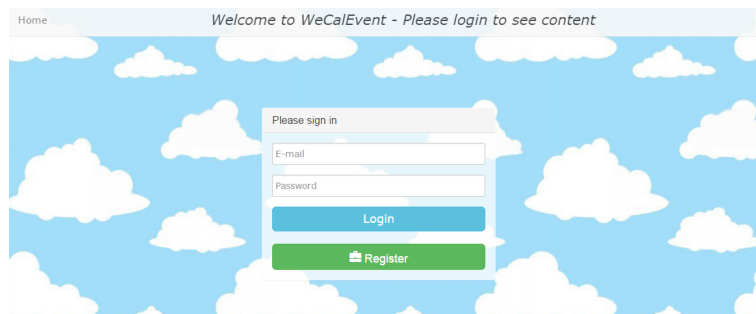

WeCalEvent is a web based application, in order to use it a web browser is required. We recommend Google chrome or Mozilla FireFox.

Usually we use this web address to access to WeCalEvent web page : <http://localhost:8080/WeCalEvent/>

## 2 User Functionalities

### 2.1 Registration

To register the user have to open the "Main page".

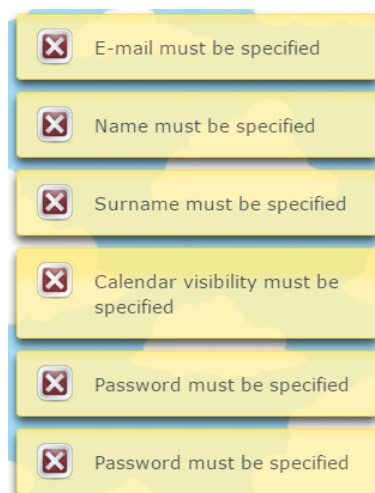

After clicking on "Register" button the user will be redirected to the "Register page":

A screenshot of the 'Register' page. The page has a light blue background with white clouds. The form is titled 'Register' and contains the following fields: 'E-mail' (with a note 'Your e-mail is also required for sending you notifications about the event'), 'Name', 'Surname', 'Calendar Visibility' (with radio buttons for 'Public' and 'Private'), 'Password' (with a note 'Password should be at least 4 characters'), and 'Password (Confirm)' (with a note 'Please confirm password'). A green 'Register' button is at the bottom.

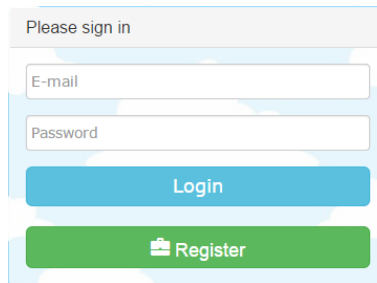

If all fields are filled in right the user will be registered after pressing "Register" button.

In case if not all fields are filled in, below notifications will appear:

## 2.2 Login
